## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12 are drawn to “a process of producing a temperature-dependent switch”, classified in class 29, subclass 622.
  - II. Claim 13 is drawn to “a temperature-dependent switch”, classified in class 337.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of groups I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the switch can be made by another and materially different process, at least in part, because the step of “stamping of an adhesive layer” recited in claim 1 may be substituted with the step utilizing different way of depositing of said adhesive layer (e.g. spraying, printing, painting, etc.)

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Also, because these inventions are distinct for the reasons given

Art Unit: 2835

above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
